

HIGH Q GREENHOUSES INFORMATION SHEET

ORNAMENTAL GRASS – PENNISETUM Setaceum ‘Rubrum’

Pennisetum setaceum is a tender perennial fountain grass that is native to Africa, southeast Asia and the Middle East.. Best performance is in full sun, it will not survive winter and is typically grown as if it were an annual. ‘Rubrum’, sometimes commonly called purple or red fountain grass, is a burgundy-red leaved cultivar that is not invasive as it rarely sets seed. Showy, fluffy, burgundy-purple flowers in bottlebrush-like spikes top flower stalks that arch upward and outward above the burgundy-red foliage clump in summer. Height is usually 3-5 feet and spreads 2-4 feet.
